Issues Employers Should Consider Regarding Coronavirus:

- Employers and employees should avoid prejudice and not assume any ethnicity is more or less susceptible to the virus.
- Avoid asking employees questions about any known or suspected medical condition or medical history. In 2009, the Equal Employment Opportunity Commission (“EEOC”) released a notice titled “[Pandemic Preparedness in the Workplace and the Americans with Disabilities Act](#),” which provides guidance.
- Follow federal, state and local laws, as well as any agency policies and/or collective bargaining agreements provisions, covering family and medical leave entitlements, and confidentiality requirements.
- If applicable, refer to your agency’s pandemic or health protection policy for further guidance.

Actions Employers Can Take to Prevent Transmission of Coronavirus:

- Employers should prepare for the possibility that some employees may have to stay home in the event of school closures or childcare concerns.
- Employers should ensure that common areas in the workplace, including computer keyboards used by more than one person, are kept clean and disinfected.
- Employers should inform employees that information regarding medical conditions is kept strictly confidential and they will not suffer retaliation for reporting an illness or if they need to take a family or medical leave
